

THE FLAVOR HATCH

The MINI's Flavor Hatch allows flavored syrups and powders to be added to the pitcher while the froth is being prepared. The resulting flavored froth is extraordinary; try vanilla, caramel, or hazelnut syrup. Or experiment on your own. It's a fabulous taste sensation!

FULLY AUTOMATIC

The MINI takes the pain out of preparing luxurious froth for cappuccinos and lattes. Simply pour cold milk into the Frothing Pitcher, press the ON button, and wait about three minutes for the MINI to stop automatically. Pour the desired quantity of heated milk into your hot beverage, then spoon out the most sumptuous froth you have ever tasted. With the Froth Au Lait® MINI frother, you too can be a BARISTA!

Just follow these FIVE EASY STEPS:

- 1) Install the Froth Whip
- 2) Pour in the Cold Milk
- 3) Start the Frothing Cycle
- 4) Pour out the Hot Milk
- 5) Spoon out the Rich Froth

LUXURIOUS FROTH – COMPACT DESIGN

Froth Au Lait's patented Froth Whip Technology is the key to the MINI's rich, luxurious froth. Working together with its built-in heater, the MINI's unique whipping technique aerates the milk and turns it into long lasting, meringue-like froth. Because the MINI requires no steam, its design is safe, reliable, and simple to operate. The elegant and compact design of the "MINI" is a stylish addition to any kitchen countertop.

LARGE FROTHER FEATURES

Despite its compact size and attractive price tag, the Froth Au Lait® MINI is a full featured and powerful automatic hot milk frother. Prepare mounds of rich, meringue-like froth in just minutes. Savor the long lasting froth for thirty minutes or more! While designed to save space, the MINI can prepare up to six servings of froth in one cycle. Use the built-in Flavor Hatch to add your favorite syrup or powder to make luscious flavored froth or mouth watering Hot Chocolate (Latte whip required). The Froth Au Lait® MINI is truly a "BIG" frother in a compact package!

YOU HAVE CONTROL!

The Froth Au Lait® MINI can froth almost any milk product, including fat free, whole milk, reduced fat, and selected soy products as well. Utilize the Froth Whip to prepare especially rich froth for cappuccinos, or the Latte Whip when thinner froth is desired. Because the MINI requires no steam, its froth can be "refreshed" to its original temperature and richness at the touch of a button. Up to three cups of froth can be prepared in one three minute cycle. Because the Frothing Pitcher is clear glass, cleaning is quick and easy, and you can observe the frothing process in action. With the Froth Au Lait® MINI, you can customize your froth to your specific taste!
